

★ SUPERCHARGE[®] **BATTERIES**

HYBRID AUXILIARY

Designed to power on board electronics.

- > Original equipment for hybrid and electric vehicles
- > Built to withstand prolonged and deep continuous power discharge
- > Assures optimal operation of all on-board electronics
- > Designed for optimal electrical conductivity and power management
- > Engineered with hardened framed plates and corrosion-resistant alloys

Reliable, Long service life, Built to last.

Electric and hybrid vehicles require a 12 volt battery

Powered by 12 volt battery in electric cars
